Experience has TAUGHT Architects **MEDUSA STONESET**is unparalleled for Masonry Construction

For masonry construction in schools, architects have learned from experience that Medusa StoneseT White Masonry Cement is unsurpassed. It is the only prepared white masonry cement made with a Portland Cement base. Used white or tinted, Medusa StoneseT provides strikingly beautiful, contrasting or harmonizing joints — free from stains. It looks better and lays up smoothly when used with natural stone, brick, concrete block, tile or glass block.

And StoneseT mixes easily and is economical. Everything but the sand and water is in the bag — eliminating costly on-the-job admixtures. You get uniform color, strength and workability bag after bag.

Write today for free catalog sheet R.A.I.C. 3-A-9 giving uses, advantages and specifications for StoneseT mortar.
