Design concepts for Ontario Place 63.

1. CREATION OF EXHIBITION BUILDING.

To suspend 5 exhibition pods from pylons set symbolically into Lake Ontario. Precedents: Giffel Tower - Oilrig.

Due to wave action too costly.

UHF to Botof Island (Bahamas) for up selection, saves installation costs and safe island.
(3) RECLAIMING SHORELINE FOR PEOPLE

the meeting of sea and land
brought to a poetic atmosphere

(2) CREATION OF URBAN PARK LAND.
The idea of clade protection through land fill leads to the addition of islands that can be used as urban parks, villages for shops and restaurants, canals, performance places, closed areas for sea etc.
